ezgikuzu / README.md

About Me:

I am a developer focused on frontend development, aiming to build user-centered digital products. I create high-performance, scalable, and visually appealing interfaces using modern web technologies.

I hold a degree in Biology and am currently pursuing a Master's degree in Biotechnology, with a growing interest in bioinformatics.

I am particularly interested in mobile technologies such as React Native and Flutter, while also improving my native development skills with Swift.

In my projects, I prioritize UX/UI principles and develop solutions that place user experience at the center. I am open to continuous learning and strive to improve myself by following new technologies.

Areas of interest:

Frontend Development

Mobile App Development

UI/UX Design

Bioinformatics
